**PHOTOSYNTHESIS, LLC** is dedicated to providing photographers, artists, and students with a comfortable, enriching environment in which they can learn the craft of photography and refine their techniques at their own pace. Additionally, we offer services for those not inclined to partake of the hands-on aspect of our business. Individuals and organizations of all sorts can benefit from our solutions to their photographic needs.

**PHOTOSYNTHESIS** is the only facility of its kind in the area. Our rental spaces, workshops, gallery, schedule of events, and varied services make us a destination to visit often.

It is our belief that people in this digital age desire an outlet for handcrafted creativity. We offer this in the form of rental darkrooms for traditional black-and-white photography and alternative processes. Many of our workshops address the teaching of these nearly *lost arts*. There is a certain satisfaction to learning these processes and helping to maintain them as the legitimate forms of art that they are.

This said, we do understand that current demands are for digital photography and computer-aided image-making. Our wide-format printers, digital workstation, and workshops answer the needs of those working in the digital medium.

A rotating display of photography can be found in our gallery. Each show generally hangs for three to six weeks. Check our website for upcoming exhibits, openings, and other gallery events.

It is our intent to provide people of all ages with a learning experience in photography. Please inquire about future possibilities for small school groups, scout troops, and other organizations.

**PHOTOSYNTHESIS** also offers a selection of lab and studio services, including custom B&W fiber printing, fine art inkjet printing, print finishing, and various studio camera services. Check our website for the most current information.

## FOR PHOTOGRAPHERS, ARTISTS, CRAFTSMEN, AND STUDENTS OF ART

### RENTAL SPACES

Members enjoy a small session fee for most rental spaces. Our rental spaces are available on an hourly basis to non-members. Check our *Rental Spaces* publication for pricing and more specific details and our *Memberships* publication for other benefits. Spaces are occasionally reserved for workshop students only. Schedules will be published on our website.

- **Darkroom:** The darkroom is equipped with five enlarging stations. Print as large as 16x20 from any size negative up to 4x5. There is a nominal fee for film chemistry.
- **Alternative Processes:** A vacuum print frame and UV light source are provided for those practicing historical and alternative processes.
- **Digital Print Station:** Computer station optimized for photo editing and printing. Software includes Photoshop CS3 Extended, InDesign, Illustrator, Flash, Dreamweaver, Acrobat, and Lightroom, as well as QuadToneRIP for B&W and nik software plugins to expand on Photoshop's capabilities. Hardware includes a LaCie 24" wide-screen monitor, Epson V-750 scanner, and an Epson 9900 44" printer, capable of giant archival pigment prints on many types of paper.
- **Finishing:** Equipment and ample space is provided for mat cutting, dry mounting, and framing prints.
- **Studio:** Approximately 360sf. Suitable for small group portrait sessions and product photography for websites and eBay. Includes two muslin backgrounds, camera stand, tripod, two studio strobes with softboxes, light stands, boom stand, and sweep table. Additional rental equipment available by reservation.

### WORKSHOPS

Workshops and short-term non-credit classes are offered in a variety of photographic disciplines. Check our website or current *Workshops* publication for upcoming courses. Possibilities include:

- Intro, Intermediate, or Advanced B&W Darkroom
- Toning
- Hand Coloring
